

Cirrascale RM Series Rackmount Server Solutions

Powered by Intel® Xeon® E5-1600 and E5-2600
Processor Families for Breakthrough Performance

The Cirrascale RM Series of rackmount servers are optimized for space-constrained enterprise computing and data center installations. With a full line of enterprise solutions, the Cirrascale RM Series servers are essential in today's Web 2.0 and cloud-centric data centers where server consolidation is a key factor in ROI for applications such as Software as a Service (SAAS) and web hosting.

With the recent introduction of the Intel® Xeon® E5-1600 and E5-2600 processor families, the RM1400 Series servers feature robust performance and increased reliability. Available with two or more Gigabit Ethernet ports and optional SAS or SATA RAID, the RM1400 Series servers are designed from the ground up with web and application hosting in mind. With our RM Series supporting up to 32TB of storage and up to 192GB of DDR3 RAM, these servers are also an ideal solution for storage heavy applications or virtual machine serving.

Cirrascale's RM Series Rackmount Servers are designed to give customers breakthrough performance, higher density and larger energy savings. Delivering the technologies needed to replace an inefficient and aging installed-base, Cirrascale's latest RM Series servers facilitate higher utilization while providing amazing computing performance.

With these new products, Cirrascale is facilitating data center transformation by providing scalable performance and reduced power consumption. Customers deploying next generation scale-out infrastructure benefit from the combination of Intel's latest processor platforms with Cirrascale's latest server technologies enabling extreme density and unmatched efficiency and reliability.

The Cirrascale RM Series servers are designed with the data center of the future in mind and are available with many advanced features. Cirrascale supports multiple configurations and can tailor any system to your specific needs. If you have questions, please contact us today at (888) 942-3800 and ask to speak with a Cirrascale Account Manager.

About Cirrascale

Cirrascale Corporation is a premier provider of blade-based GP/GPU, cloud computing and storage infrastructure for conventional and containerized data centers. Cirrascale leverages its patented Vertical Cooling Technology to provide the industry's most energy-efficient standards-based platforms with the lowest possible total cost of ownership in the densest form factor. Cirrascale sells to large-scale infrastructure operators, hosting and managed services providers, Cloud Service Providers, and HPC users. Cirrascale also licenses its award winning technology to partners globally.
